## WORK EXPERIENCE

### Full Stack Developer Eternal Plans Inc.

11/2023 - Present

- Develop and maintain 3 Laravel web applications serving 300+ users and processing high-volume transactions for agency partners, internal departments, and public applicants.
- Built sales tracking portal with payment batching, digital wallet, and automated reporting for 40+ agencies; migrated 6+ legacy HR modules (Time Records, DTR Override, Timesheet) to web-based system serving 100 employees.
- Architected full-stack Online Application System with form validation, Laravel Queue-based notifications (email/SMS), and REST API integration to internal CRM and sales systems.
- Collaborate with 4-developer team using Git and Excel-based tracking; conduct code reviews, deliver training to partner agencies, and maintain technical documentation.

### Web Developer Intern Xurpas Inc.

08/2022 - 09/2022

- Integrated 16+ RESTful API endpoints with React.js and Redux for web-based Purchase Order Management System, implementing full CRUD operations across 5 modules (Purchase Orders, Proposals, COCA, Goods Receipt, Invoices).
- Developed responsive UI components using Material-UI, creating interactive forms and action buttons to trigger API calls for create, read, update, and delete operations.
- Collaborated with 4-person frontend intern team and backend developers through daily Agile standup meetings to deliver features on sprint schedule.

## EDUCATION

### Bachelor's Degree in Computer Engineering Polytechnic University of the Philippines

2019 - 2023

Sta. Mesa, Manila

- Consistent President's Lister from A.Y. 2019 - 2023
- Appointed Class President for A.Y. 2021 - 2023
- Appointed Vice President for Research, Extension, and Development in College of Engineering Managers of Information Technology (CEMIT)
- Active participant in Quiz Bee and Quiz Bowl Competitions

## SKILLS

HTML

CSS

JavaScript

Laravel

PHP

Node.js / Express.js

Restful API Development

Jquery

React.js

Alpine.JS

Flutter / Dart

MySQL

MongoDB

Git / Github

CI / CD

## PERSONAL PROJECTS

### CAREVA (09/2025 - 11/2025)

- Developed cross-platform mobile application with backend API integration, implementing user authentication, NFC tag reading/writing functionality, and community feature including social media and messaging system.
- Architected a full-stack solution with mobile frontend and RESTful backend, designing a database schema to securely store sensitive health records while ensuring seamless data synchronization between mobile app and server.

### Jokejoke (02/2025 - Present)

- Building real-time social media application with reactive UI components, enabling users to share content, engage with community posts, and interact through dynamic features without page refreshes.
- Currently developing full-stack web platform with modern frontend framework and responsive design, implementing user authentication, content management system, and database-driven interactions for scalable community growth.

### JustAnotherComputerShop (11/2022 - 06/2023)

- Built full-stack e-commerce platform with product catalog, shopping cart, and checkout functionality, implementing order management system for seamless customer purchasing experience.
- Designed and deployed complete web application using modern JavaScript stack with NoSQL database, creating RESTful API for frontend-backend communication and implementing responsive UI for optimal user experience across devices.
